*Freshfield 19<sup>th</sup> October*

## Altcar 17<sup>th</sup> May

On the day six new species were added to the Altcar list .

Crosswort *Cruciata laevipes* (near the River Alt) when on with the entomologists in the day and Knotted Clover *Trifolium striatum*, Variegated Dead-nettle *Lamium maculatum* , Pink Sorrel *Oxalis articulata*, Rat-tailed Fescue *Vulpia myuros* and then unfortunately New Zealand Pigymweed *Crassula helmsii* at Wally's Pond. Also I found out while putting together this talk a seventh new species Curly Pondweed (or African Elodea) *Lagarosiphon major* (introduction – South African) at I Range. So Altcar list is now 437 species.
